Norway, Oslo Fire Department and PGT Norway, Cleaning Up Of A Fuel Spill In Oslo With OSE II

[Steven Pedigo](#) Is the foam from OSE II, I should be in Oslo in late January or early February.

Hi Steven. The spil was about 50 liters, and we use about 100 liters with water mixed With 2% OSE II. The temperature was around freezing point. Best regard Karl
sorry. we use 1000 liter of water

We put on a pre-mix With 2% OSE II after 20 minutes we use water from the firetruck and flush it in the drain. The road was no longer slip and the VOC's had been removed according to meter before flushed in the drain.

[Karl Dietrichs](#) It is OSEII Steven. The Fire department was impressed. Send me a mail when you now the date you are in Oslo.

Da brannvesenet kom, var oppryddingen i god gang. Noen hadde overfylt ikke en ubetydelig mengde på en bensinstasjon på Dombås. Både lokalt brannvesen og PGTN personell ryddet i fellessjap opp andres synder.

When the fire department came in, the cleanup was good. Someone hadn't overrun an insignificant amount at a gas station on dombås. Both local firefighter and pgtn personnel cleared up the fellessjap of others.

[Karl Dietrichs](#) It is OSEII Steven. The Fire department was imprest. Send me a mail when you now the date you are in Oslo.
